## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of the group 1 species in the reply filed on 6/17/05 is acknowledged.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Acampora (U.S. Patent No. 6,314,163).

Regarding claims 1 and 24, Acampora teaches the base station comprises a variable-wavelength transmitter (reference numeral 113, 114 in Figure 3d) for transmitting an optical signal having a predetermined wavelength, and an optical coupler (e.g. the lower box below 113, 114)n for combining optical signals from the variable-wavelength transmitter in order to transmit the optical signals using the wavelength multiplexing transmission method; the control station (reference numeral 12 in Figure 1) comprises a plurality of optical receivers (inherent in the ability to communicate with a plurality of subscribers as seen in Figure 1) for receiving wavelengths of the optical signals transmitted using the wavelength multiplexing transmission method, and an optical coupler (reference numeral 117 in Figure 3a) for splitting the wavelength-multiplexed optical signals transmitted from the base stations to the optical receivers

by wavelength; and when the radio communication terminal communicating with the base station moves and changes the base station to communicate with, a new base station which communicates with the radio communication terminal after a movement of the radio communication terminal controls the wavelength of the variable-wavelength transmitter, and then transmits the optical signals to the control station with the same wavelength as one used for transmitting by a previous base station which communicates with the radio communication terminal before the movement (e.g. “handoff” of column 22 line 53 – column 23 line 62).

#### ***Response to Arguments***

4. Applicant's arguments filed 10/27/05 have been fully considered but they are not persuasive.

5. In response to applicant's arguments, the recitation “in a ring-shape” has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

#### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2633

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
